

HFI 580 - \$189 USD

The new HFI-580 (formerly the HFI-550) is one of our most popular, robust and versatile headphones. Featuring our uber tough 50mm Mylar driver, the HFI-580 can crank out lots of volume without falling apart. The driver is almost impossible to blow, making the HFI-580 a great addition to any studio be it pro or just starting out. Also included in the new HFI-580 is our new S-Logic Plus surround sound technology which delivers an ever more life like sound in a smaller package. The HFI-580 now also comes standard with ULE (Ultra Low Emission) 98% Mu Metal shielding standard, thicker earpads and headband pad and a new velvet carrying bag.

Best For: Drummers, Bassists, DJs

S-Logic™

Ultrasonics headphones with patented S-Logic™ are the first headphones to utilize your entire ear in the listening experience. Through the use of decentralized driver positioning, S-Logic™ headphones aim the sound at the outer ear or pinna. Because the sound does not go directly down your ear canal as with conventional headphones, but instead filters off the outer ear as you listen and perception of distance, depth and instrument placement are greatly enhanced. You can hear the mix exactly as the engineer heard it in the studio.

Safer Hearing

An added benefit of S-Logic technology is an up to 40% (3-4dB) drop in SPL (sound pressure levels) for the same perceived volume. This means the Ultrasones put less pressure on your eardrum than any other headphones. Because of this, the risk of hearing damaged is greatly reduced and you can listen for longer without fatigue.

Tech Specs

S-Logic™ Natural Surround Sound Plus

Dynamic principal

50mm Mylar Driver

Frequency range 10-22.000 Hz

Impedance 32 Ohm

Max sound pressure level 101 dB

MU Metal bufferboard, ULE Standard 98%

Recommended minimum burn-in time: 8 hours

Weight 285 g (without cord)

Long-term availability of spare parts
